

FIRE SEALINGS

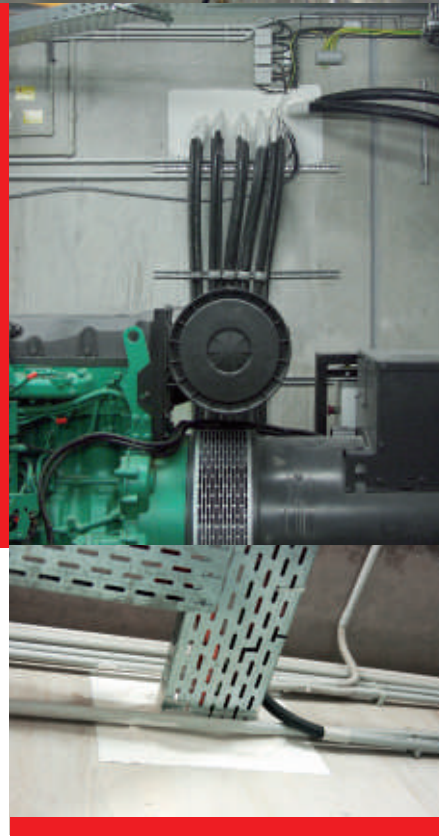

PROTECTION OF PASSAGES OF FIRE DIVIDING STRUCTURES

K.B.K. fire
protipožární ochrana

Fire sealings provide a complex system of protection of passages in fire dividing structures. It is possible to seal passages in walls, ceilings or light partitions. Further, we offer the option of sealing construction joints and fire cladding of constructions including doors with fire resistance PROMAT, HILTI, INTUMEX and other.

FIRE SEALINGS

Types of sealed passages through fire dividing structures:

- passages of cables (individual cables, bunched cables)
- passages of cable trays
- Passages of non-flammable pipings (water, gas, heating etc.)
- Passages of air-conditioning duct
- Passages of flammable pipings (water, sewerage etc.)
- Fire sealings, sealing of construction joints and other applications are done in the systems PROMAT, HILTI, INTUMEX and other.
